

Therapeutics/medicines:

- Local anaesthetics (i.e. bupivacaine, ropivacaine etc.)
- Anesthetic gases
- Neuromuscular blocking agent (e.g. atracurium, rocuronium, succinylcholine etc.)
- Antibiotics broad-spectrum (in particular oral formulation for **pediatric** population)
- Antibiotics, including treatment for MDR (multidrug resistance): (i.e. imipenem, meropenem, linezolid, cefepime, vancomycin, metronidazole, gentamicin, daptomycin etc.)
- Antiarrhythmic, beta-blockers, antihypertensive (oral, injections)
- Anti-asthmatic (e.g. salbutamol, including **pediatric** etc.)
- Oral anticoagulant and LMWH (Low molecular weight heparin)
- Insulin and oral antidiabetics
- Antiseptic / disinfectant (surgery room, ICU), e.g. povidone-iodine, chlorhexidine
- Cryoprecipitate / blood coagulation factors / Fibrinogen
- Anxiolytic, antidepressant, antipsychotics (in particular oral formulation)
- Antidotes (i.e. naloxone, flumazenil etc.)
- Anti-epileptic (both Adult and **pediatric** formulations)
- oxygen

Medical equipment

- Equipment and consumables for anesthesia, including **pediatric** (e.g. masks, tubes, laryngeal masks, cannulas, circuits, all consumables, needles etc.)
- Surgical instruments, including **pediatric** (general surgery, abdominal, orthopedics, gynecologic etc.)
- Anesthesia ventilators
- **Pediatric** / newborn ventilators
- CPAP and NIV devices and consumables
- Burns kit
- Surgery room consumables
- Defibrillators (manual and AED), electrocardiographs
- Immobilization and orthopedics medical devices – equipment for plaster room
- Central vein catheterization kit
- Oxygen concentrators (>20 L/min)
- Mobile x-ray machines
- Vacuum aspirators/suction units
- Portable test and diagnostic equipment (oximeter, sphygmomanometers, glucometer, INR, otoscope, ophthalmoscope etc. – including **pediatric**)
- **Pediatric** equipment (all devices, e.g. needles, masks, ventilation devices, CPAP systems, humidifier etc.)
